COMMERCIAL INSTALLATIONS

BEAUTIFUL Marshtile is the new popular low cost wall treatment for commercial establishments. This lustrous easy-to-clean material creates an atmosphere of cleanliness and warmth which has never before been equalled in a wall tile finish. It stimulates strong customer pulling power. Increased business will soon pay for the investment. The large sheets of Marshtile can be easily installed over present walls at low cost. Business need not be suspended to install Marshtile.

STORES Unlimited attractiveness and utility can be added to your store by using Marshtile on sidewalls and fixtures. Old equipment such as counters, butter or meat cases, produce racks, coolers or other fixtures may be quickly converted into up-to-date equipment by installing Marshtile right over the old surface.

MEAT MARKETS In meat markets where sanitation and cleanliness are so important, Marshtile fits the conditions ideally as it has a high lustre washable surface that gives a sparkling clean appearance.

RESTAURANTS In restaurants, beauty, sanitation and serviceability are necessary. Grease and stains are easily removed by simply washing with soap and water. Marshtile is easily applied directly over plaster or any flat wall surface without disturbing the original wall.

BARBER SHOPS Marshtile is well adapted for barber shop work especially from the standpoint of beauty and utility.

HOSPITALS For corridors, operating rooms, lavatories, and hospital kitchens, Marshtile meets the requirements of cleanliness and durability at a cost that is not prohibitive.

HOTELS Marshtile is admirably adapted for use in bathrooms, showers, lobbies, as well as in the kitchen.

MARINE The lightness, flexibility, wearing qualities, and the ease of cleaning make Marshtile the proper material for galleys, toilets, and bathrooms of boats and liners.

SERVICE STATIONS Marshtile is the proper material to use in the offices, restrooms, and lubritoriums of super-service stations. Its ease of cleaning, beauty and attractiveness will prove definite factors in increasing sales.

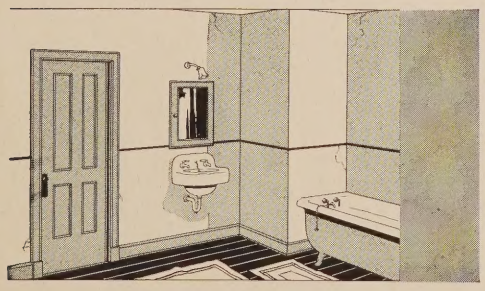
...nished Walls *are desired*

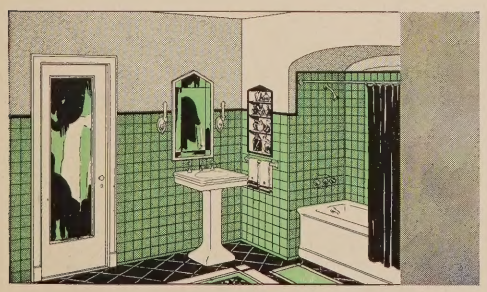
WHAT IS MARSHTILE? Marshtile is a permanent sanitary and lastingly beautiful interior wall finish in sheet form, that can be installed over old or new walls or woodwork. Basically it is a specially processed, oil treated, water-proof material to which a hard, but flexible glazed surface is permanently integrated.
The tile-like glaze surface is finished by a burnishing treatment which completely seals the pores so that moisture and dirt cannot penetrate. Acids, alkalis and non-abrasive cleaning compounds are repelled, insuring a stainproof, easy-to-clean surface which retains its beautiful appearance for years.

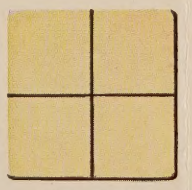
MARSHTILE IS EASY TO INSTALL Marshtile is inexpensive to install; installation of the large sheets of Marshtile is made quickly and with little inconvenience or muss. It can be easily sawed and fit around windows, doors, and plumbing fixtures.
Marshtile moldings have been designed to enhance the beauty and facilitate the ease and speed of installation.

BATH ROOM In the average home, or apartment, the bathroom is the hardest-to-keep-clean room. Not so if decorated with Marshtile. Its spick and span cleanliness requires but a few minutes time, occasionally, to sponge off the glossy surface. You cannot realize how clean and cheerful you can make your bathroom. The cost is low—less in fact, than the increased value that will be added to your property.

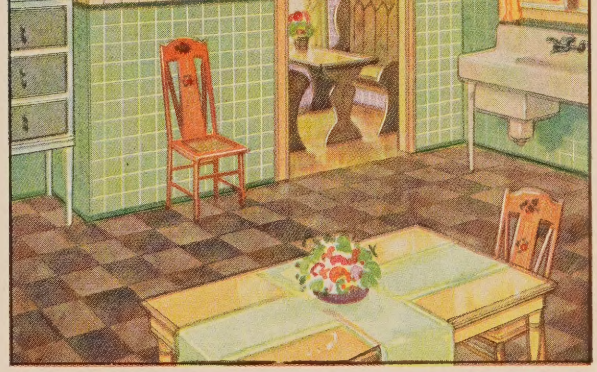
Marshtile provides satisfaction that cannot be measured in dollars.







LARK IVORY



YOUR DREAM KITCHEN

More time is spent and more work is done in the kitchen than any other room in the home. A great deal of the undesirable work is in cleaning. You can relieve much of the kitchen drudgery by having Marshtile installed right over the present walls, at a reasonable cost. How proud you will be of your beautiful, modern, clean, kitchen.

Pictures can only give you an idea of how lovely your rooms will be with Marshtile. You must see actual installations to fully realize the clean beauty, cheerfulness and charm that Marshtile will give in your home. Visit the Marshtile dealer at your first opportunity. He will gladly show you sample installations and give you cost estimates without obligation.

Actual 8" block sizes center-to-center of score—7 58/64"
4' and 8' block sheets have protective edge.

Application

Complete working installation instruction sheet is furnished with each shipment, copies on request. Marshtile can be satisfactorily installed over old or new walls, ceilings, or woodwork. Any careful mechanic can install Marshtile; application is not difficult.

Marshtile can be sawed, planed and fit just like wood. Use tools customarily used for woodworking.

Find low point of room and measure up to tile treatment height, make level mark around the room wall, this to be the guide-line in fitting and applying Marshtile.

Sheets are cut, fit and cemented to the wall in a progressive manner, nailing occasionally with small brads to hold Marshtile in place while the cement is setting. Use Marshtile waterproof cement.

Joints can be neatly made to look the same as other score lines. For bath tubs, special M-70 non-rusting tub mould is used directly on top of the tub which is designed to receive Marshtile.

Corner and casing molds are applied as work progresses.

Cap and base moldings are installed as the last operation, these mouldings should be set in waterproof plastic cement and securely fastened with finish nails, in score lines, then countersink, and fill with joint pointing compound to match joint.
